

# Kahua Records Exciting Updates!

*Please note: This will be our last newsletter for the Spring*

## Kahua Records Newsletter March 2018

With Raphael and Kutira

This newsletter is a celebration of the many rather miraculous miracles that have been associated with our music over the past 30 years. Some of these miracles may be hard to believe but they are backed up by many witnesses and science.

***“Where ancient traditions meet cutting edge science”***

### Music To Disappear In

This is considered a landmark recording, and is one of Hearts of Space Records first releases 35 years ago. Raphael's legendary and most famous album built the bridge between classical and deep spiritual meditation music that eventually created a new musical genre. This album has a history of miracles and is one that people listen to over and over because of its connection to spirit.

Raphael had his first near death experience at the age of 6. So it is no accident that in 1983 Raphael released an album called Music to Disappear In. During all these years, Raphael received hundreds of letters or people would come up to him after a concert and shared: “The last thing my mother, (father, brother, grandfather, etc.) heard was your album over and over.”

### New Music Release: Life After Death

Just as science is exploring outer space exponentially, science is now exploring inner space in a dynamic way. Now we are beginning to see the “geography” of life after death”. So many people think of life after death as being ethereal with harps and clouds when in reality there is more life and more life and more life! This album

explores these experiences.
